

Code Path Application

CodePath For Credit - Intermediate Web Development Application

Application Status

You have applied to the **For Credit - Intermediate Web Development** program.
Thanks for applying!

Initial Application: Submitted
Submitted on January 6
[VIEW](#) / [EDIT](#) / [CANCEL](#)

Schedule: The class will follow along the schedule arranged by their university/college.

Add us to your contacts

To make sure you receive all CodePath emails, please add our emails to your trusted list of senders, contacts or address book

- support@codepath.org

Zaynah Mohammad

Yesterday at 7:32 PM

Hello Everyone, im Zaynah and I am a Data Science and Analytics engineering major, Im excited to learn new things in this class!

Sunny Chen

Yesterday at 7:37 PM

Hello everyone, my name is Sunny and I am pursuing a Master's in CS with a minor in AI. I'm currently working as an electrical engineer and would like to expand my skillset to bridge the gap between hardware and software. I am excited to learn and I hope everyone has a good semester!

Dalia Baker

Yesterday at 8:29 PM

Hi everyone! My name is Dalia and I am a senior majoring in Computer Science with a minor in Cybersecurity. Excited to be working with everyone!

Darian Cheung

Yesterday at 8:31 PM

Hello everyone, my name is Darian and I am working through the CS Master's program. I look forward to taking this class and working with everyone!

Aron Jimenez

Yesterday at 8:35 PM

Hello, my name is Aron Jimenez. Currently majoring in computer science with a minor in artificial intelligence.

venkatesh Reddy Ningam

Yesterday at 8:55 PM

Hello, my name is Venkatesh Reddy Ningam, i am doing my masters in computer science. I'm really excited to be part of this class and look forward to strengthening my skills in full-stack development.

Perry_Weinthal

Yesterday at 9:13 PM

Hi Folks, I am the EECS Lab Manager. I am working on my PhD in EE.

2

Anderson Carrillo

Yesterday at 10:03 PM

Hello everyone, my name is Anderson Carrillo. I am currently a computer science major with a minor in cybersecurity. I'm currently looking at a graduation date of 2026 and i'm looking forward to working with you all. (edited)

Seth Williams

Yesterday at 10:10 PM

Hello everyone, my name is Seth Williams. I am a undergrad computer science major with a minor in Cybersecurity and Artificial Intelligence. I am expected to graduate this spring. I look forward to learning with you all! (edited)

Preview

Challenge #2

```
.stats-container {  
  display: flex;  
  align-items: center;  
  cursor: pointer;  
  box-shadow: 0 0 30px lightblue;  
}
```

Challenge #3

```
/*  
 * Challenge 3: Add data about each game as a card to the games-container  
 * Skills used: DOM manipulation, for loops, template literals, functions  
 */  
  
// grab the element with the id games-container  
const gamesContainer = document.getElementById("games-container");  
  
// create a function that adds all data from the games array to the page  
function addGamesToPage(games) {  
  // loop over each item in the data  
  for (let game of games) {  
    // create a new div element, which will become the game card  
    const gamecard = document.createElement("div");  
  
    // add the class game-card to the div list  
    gamecard.classList.add("game-card");  
  
    // set the inner HTML using a template literal to display some info  
    // about each game  
    // TIP: if your images are not displaying, make sure there is space  
    // between the end of the src attribute and the end of the tag (">")  
    gamecard.innerHTML = `  
      <h3>${game.name}</h3>  
      <p>${game.description}</p>  
        
    `;  
    // append the game to the games-container  
    gamesContainer.appendChild(gamecard);  
  }  
}  
  
// call the function we just defined using the correct variable  
// later, we'll call this function using a different list of games  
addGamesToPage(GAMES_JSON);
```

Challenge #4

```
/*  
 * Challenge 4: Create the summary statistics at the top of the page displaying the  
 * total number of contributions, amount donated, and number of games on the site.  
 * Skills used: arrow functions, reduce, template literals  
 */  
  
// grab the contributions card element  
const contributionsCard = document.getElementById("num-contributions");  
  
// use reduce() to count the number of total contributions by summing the backers  
const totalContributions = GAMES_JSON.reduce((backersTotal, game) => {  
  return backersTotal + game.backers;  
}, 0);  
  
// set the inner HTML using a template literal and toLocaleString to get a number with commas  
contributionsCard.innerHTML = `${totalContributions.toLocaleString('en-US')}`;  
  
// grab the amount raised card, then use reduce() to find the total amount raised  
const raisedCard = document.getElementById("total-raised");  
  
const totalRaised = GAMES_JSON.reduce((pledgedTotal, game) => {  
  return pledgedTotal + game.pledged;  
}, 0);  
// set inner HTML using template literal  
raisedCard.innerHTML = `<p>${totalRaised.toLocaleString('en-US')}</p>`;  
  
// grab number of games card and set its inner HTML  
const gamesCard = document.getElementById("num-games");  
const gamesCount = GAMES_JSON.length;  
gamesCard.innerHTML = `${gamesCount}`;
```

Challenge #5

```
/*
 * Challenge 5: Add functions to filter the funded and unfunded games
 * total number of contributions, amount donated, and number of games on the site.
 * Skills used: functions, filter
 */

// show only games that do not yet have enough funding
function filterUnfundedOnly() {
  deleteChildElements(gamesContainer);

  // use filter() to get a list of games that have not yet met their goal
  let unfundedGames = GAMES_JSON.filter( (game) => {
    return game.pledged < game.goal;
  });
  console.log(`Unfunded Games: ${unfundedGames.length}`);
  // use the function we previously created to add the unfunded games to the DOM
  addGamesToPage(unfundedGames);
}

filterUnfundedOnly();

// show only games that are fully funded
function filterFundedOnly() {
  deleteChildElements(gamesContainer);

  // use filter() to get a list of games that have met or exceeded their goal
  let fundedGames = GAMES_JSON.filter( (game) => {
    return game.pledged >= game.goal;
  });
  console.log(`Funded Games: ${fundedGames.length}`);
  // use the function we previously created to add unfunded games to the DOM
  addGamesToPage(fundedGames);
}

filterFundedOnly();

// show all games
function showAllGames() {
  deleteChildElements(gamesContainer);

  // add all games from the JSON data to the DOM
  addGamesToPage(GAMES_JSON);
}

// select each button in the "Our Games" section
const unfundedBtn = document.getElementById("unfunded-btn");
const fundedBtn = document.getElementById("funded-btn");
const allBtn = document.getElementById("all-btn");

// add event listeners with the correct functions to each button
unfundedBtn.addEventListener("click", filterUnfundedOnly);
fundedBtn.addEventListener("click", filterFundedOnly);
allBtn.addEventListener("click", showAllGames);
```

(image taken before filter functions and console logs were removed)

Challenge #6

```
/*
 * Challenge 6: Add more information at the top of the page about the company.
 * Skills used: template literals, ternary operator
 */

// grab the description container
const descriptionContainer = document.getElementById("description-container");

// use filter or reduce to count the number of unfunded games
const unfundedGamesCount = GAMES_JSON.filter( (game) => game.pledged < game.goal).length;
const fundedGamesCount = GAMES_JSON.filter( (game) => game.pledged >= game.goal).length;
// create a string that explains the number of unfunded games using the ternary operator

const fundedGamesMsg = unfundedGamesCount == 0 ? `We've met our goal for all our games!
Thank you! Please continue to support us!` : `We have ${fundedGamesCount.toLocaleString('en-US')}
funded! Thank you! We still have ${unfundedGamesCount.toLocaleString('en-US')} games that still
need funding, please consider supporting us!`;

// create a new DOM element containing the template string and append it to the description container
const descriptionElement = document.createElement("p");
descriptionElement.innerHTML = fundedGamesMsg;
descriptionContainer.appendChild(descriptionElement);
```

Challenge #7

```
/* Challenge 7: Select & display the top 2 games
 * Skills used: spread operator, destructuring, template literals, sort
 */

const firstGameContainer = document.getElementById("first-game");
const secondGameContainer = document.getElementById("second-game");

const sortedGames = GAMES_JSON.sort((item1, item2) => {
  return item2.pledged - item1.pledged;
});

// use destructuring and the spread operator to grab the first and second games
const [firstGame, secondGame] = sortedGames;

// create a new element to hold the name of the top pledge game, then append it to the correct element
const firstGameElement = document.createElement("h3");
firstGameElement.innerHTML = `${firstGame.name}`;
firstGameContainer.appendChild(firstGameElement);

// do the same for the runner up item
const secondGameElement = document.createElement("h3");
secondGameElement.innerHTML = `${secondGame.name}`;
secondGameContainer.appendChild(secondGameElement);
```
